GRP HANDRAIL CASE STUDY

MM

MM Packaging - the market leader in packaging production in the UK.

OBJECTIVES

As a part of MM Packaging's commitment to growth and performance in the UK packaging sector, our client has embarked on a multi million pound investment at their site in Deeside North Wales. Engineered Composites supported the project team on their journey by providing **Modular Safety Handrailing systems** to protect their employees and new assets.

”

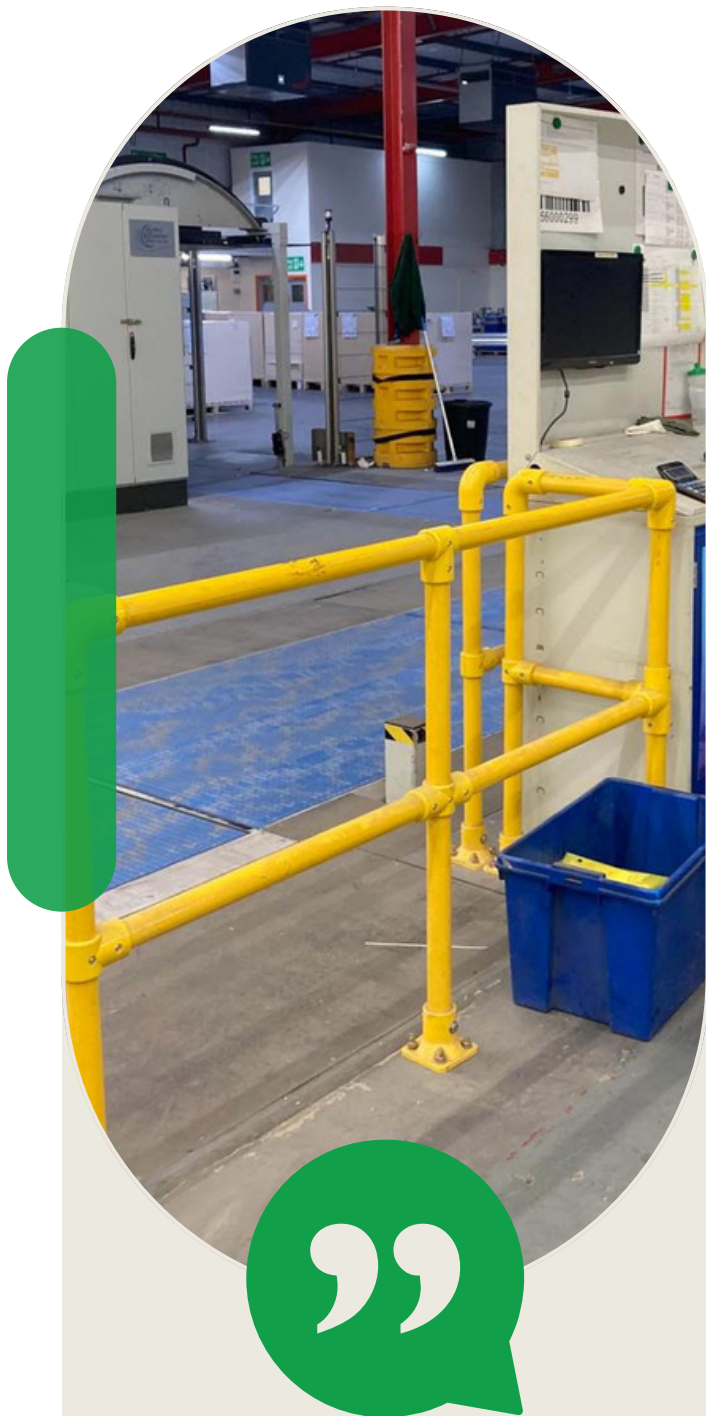

When working on a large scale investment project it was a joy to deal with the team at Engineered Composites, I would recommend them to anyone in the UK if they require quality and service at the most competitive prices.

David Whitworth, Operations Director

CHALLENGES

- Keep production disruption to an absolute minimum.
- Work to a tight installation deadline.
- Ensure costs were competitive when compared to alternative materials.

GRP HANDRAIL BENEFITS

- Cost Effective and incredibly durable.
- Low installation and maintenance costs, plus outstanding corrosion and impact resistance.
- GRP modular handrails significantly outperform steel, aluminium and timber equivalents.

SOLUTION

Engineered Composites supported the MM project team by providing Modular Safety Handrailing systems to protect their employees and new assets. As a locally based GRP Handrailing Supplier to the UK markets, our client benefited from our extensive knowledge base, backed by an unrivalled customer service which saw quotes and solutions offered on the same day and our product delivered within 48hrs.

Our GRP Stock includes:

- GRP Pultruded Profiles
- GRP Rods & Tubes
- GRP Standard Handrails
- GRP Modular Handrails
- GRP Fencing
- GRP Grating & Flooring
- GRP Interlocking Floors
- GRP/FRP Rebar
- GRP Anti-Slip Products
